GADGETS, GIFTS AND ACCESSORIES

QDOS Custom Button Cases

£20, qdossound.com

Custom Buttons are strong, flexible cases with a circular cut-out, meaning you can bang in one of three 3D buttons in four different designs, including 'skulls' and 'cameo'. Buttons are the same size so you can swap with friends, just like back in the day with Pokemon trading cards.

Orbitsound M Series

From £299, orbitsound.com

The new M series features a wireless subwoofer and Bluetooth streaming, meaning it can connect to phones and tablets for remote controlled play.

HipKey

£70, hipih.com

For those who are forever leaving their phone at home, HipKey connects to Apple devices via a free app and sounds and alarm if you leave your device behind, with a customisable alarm distance. Alternatively, attach it to your kid to keep another eye out in a crowd.
